

# FIX Conductor

FIX certification and onboarding

*Adding new clients is as easy as saying, "All Aboard!"*

**FIX Conductor™ is a complete FIX certification and onboarding service that works with existing FIX implementations.**

**Use FIX Conductor™ to:**

## Save time and cut support costs

- ▶ By automating the certification process more time can be spent finding new clients.
- ▶ Less support time results in more time delivering business value.

## Let clients certify on their time

- ▶ Clients proceed through the automated certification process with little or no support needed.
- ▶ View client certification progress and history.

## Discover issues before going live

- ▶ Certification is performed against the actual FIX interface, not a simulation.
- ▶ Easily reproduce production scenarios for testing with clients.

**Our comprehensive suite of tools manages all aspects of a typical FIX implementation from a single application suite.**

## FIX Conductor features

- ▶ FIX Conductor™ automates the task of on-boarding FIX counterparties. FIX Conductor™ provides a web-based interface for clients to certify their FIX connections.
- ▶ Multiple clients can test against your QA and simulation environment FIX systems simultaneously without any need for support.
- ▶ FIX Conductor™ provides a web accessible history for all client testing activity and certification results for an administrator to access. At any time an administrator can join a client testing session and view the FIX communication between the client and service.
- ▶ Define multiple services, each with separate test scenarios and users. FIX Conductor™ provides a single place to manage each client's connectivity, contact, and provisioning all with a simple to use web interface.

- ▶ **Track service adoption progress**
- ▶ **Generate certification reports**
- ▶ **View certification history and audit trail**
- ▶ **See what clients see as they run tests**
- ▶ **Connect to any FIX engine**
- ▶ **Manage client relationship**
