

FIX Detective™

Manage and Monitor FIX Connectivity

Ideal for both trading and technical operations staff

FIX Detective™ is a next generation FIX monitoring solution with a powerful analysis and searching tool that gives users unprecedented ability to analyse FIX connections.

Use FIX Detective™ to:

Uncover issues before counterparties do

Setup rules and alerts to find errors before they hit downstream systems.

Follow message flow through multiple connections to determine the source of the issues.

See current state of FIX services in real-time

View high business level communication that traders will understand.

Dive into the technical details of a FIX connection.

Recognise issues before they become a problem

Locate potential errors using advanced message validation.

Keep FIX services running smoother and longer so that trade revenue is not interrupted.

Lasalletech

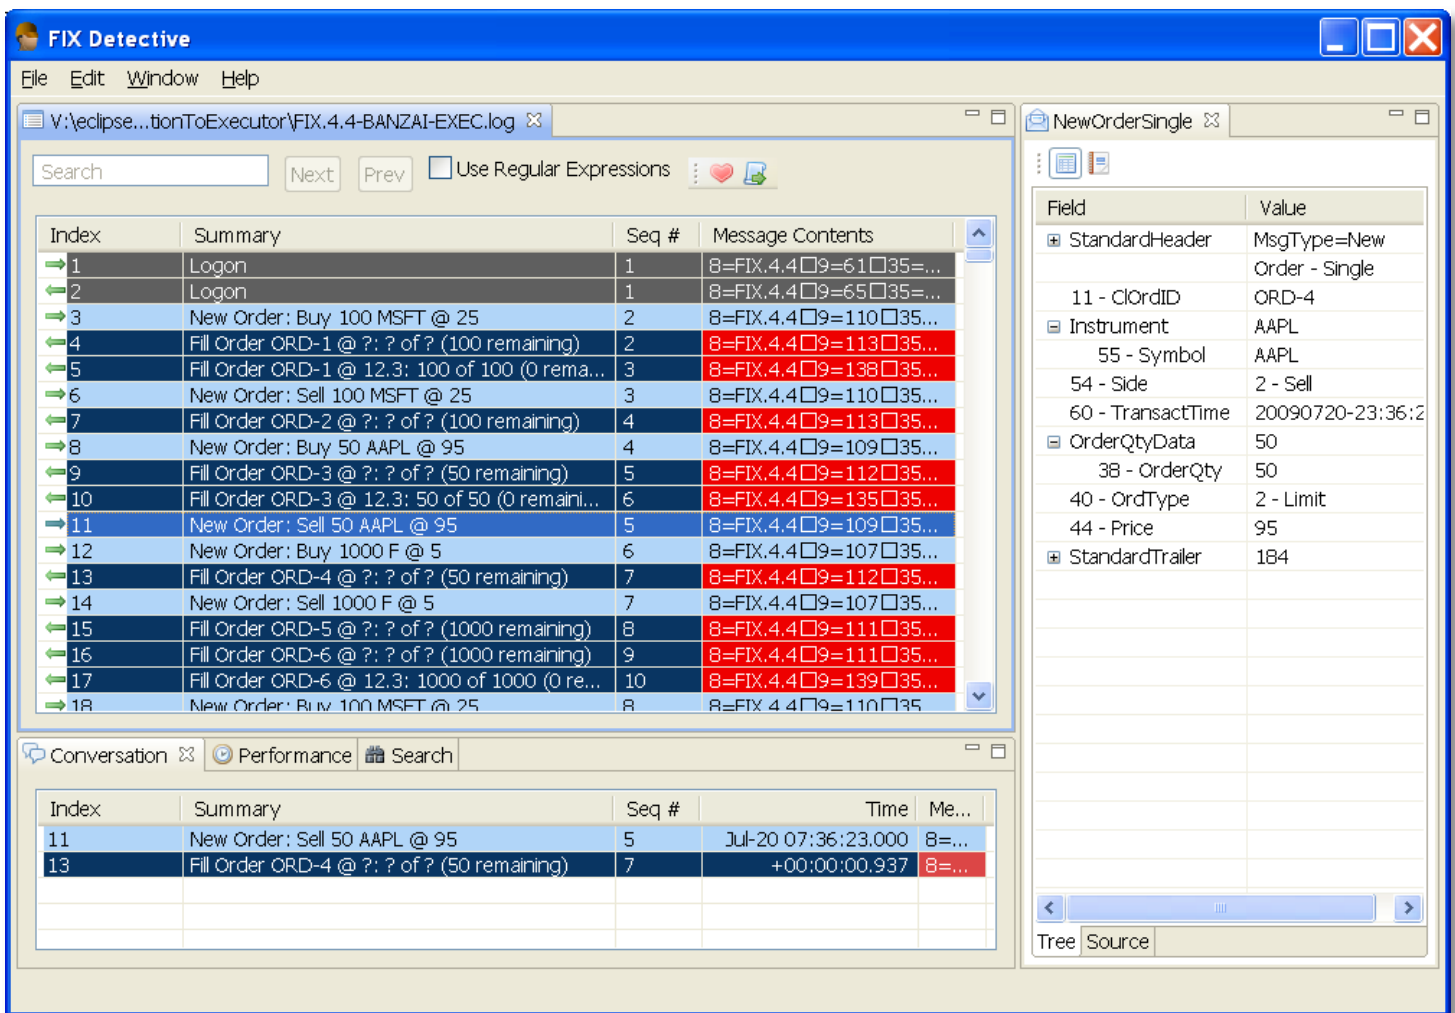

FIX Detective™ is a next generation FIX monitoring solution whose powerful analysis and searching tools give users unprecedented ability to analyse their FIX traffic, diagnose problems and resolve them in a timely manner.

Unlike other products in the marketplace, FIX Detective™ offers both an operational view of the FIX messages useful to technical staff and a business oriented view useful to traders and other non-technical staff.

FIX Detective Features:

- ✓ Real-time log viewing
- ✓ Sophisticated searching capabilities
- ✓ Human-friendly views into the log file
- ✓ Automatically reads FIX engine configuration information
